Splat Crash - PC Game SoSe2024 GAMEFABRIKIII

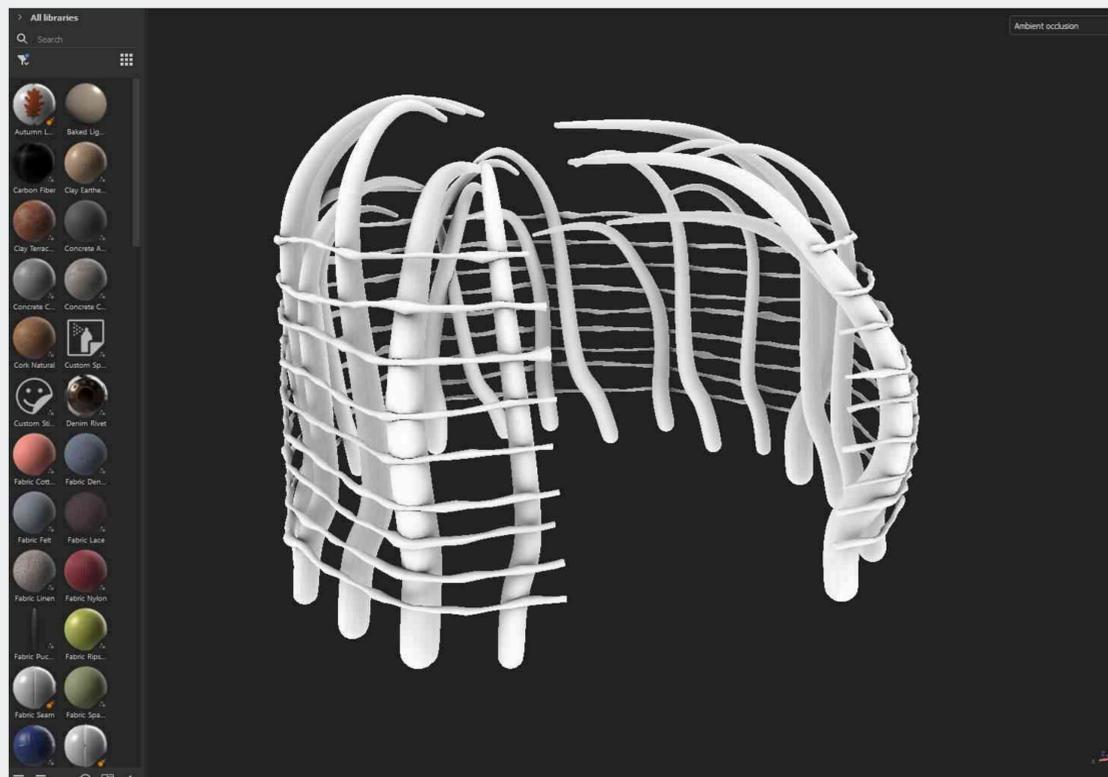

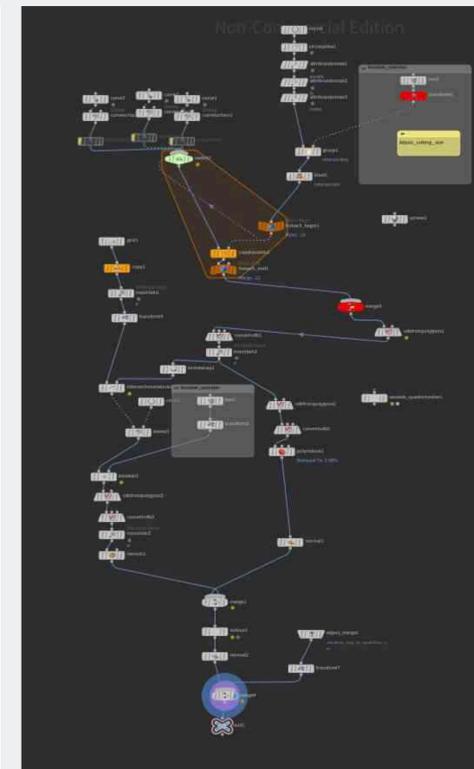

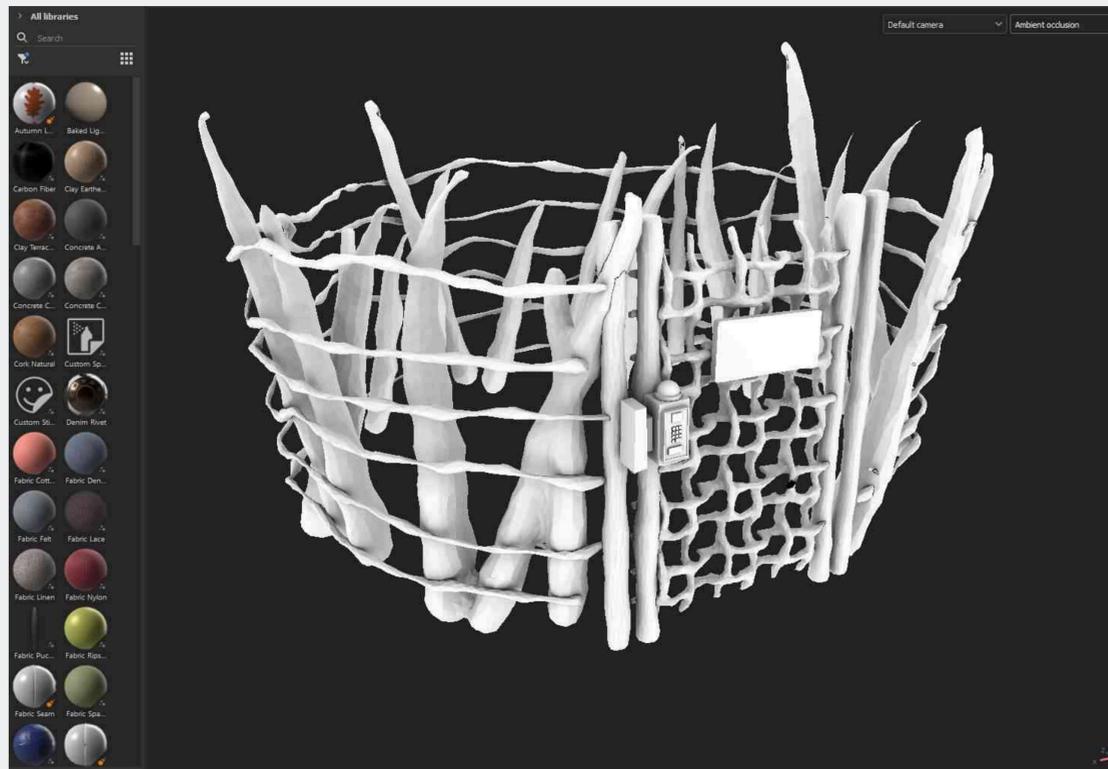

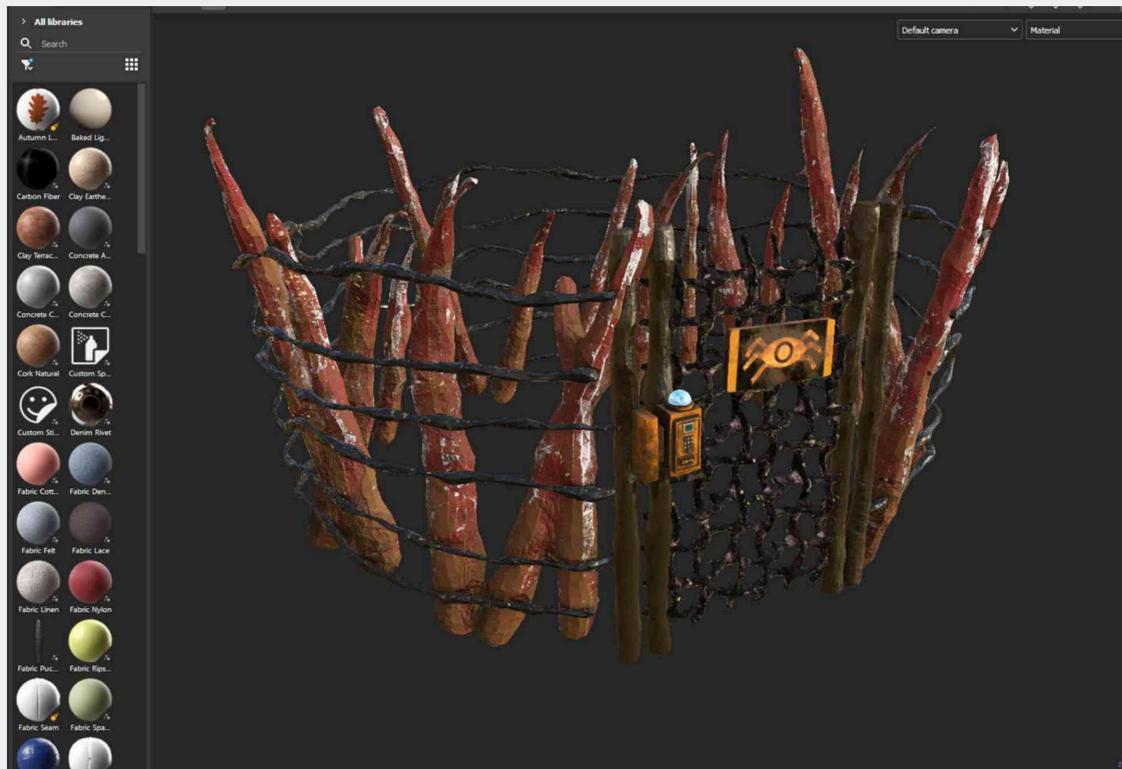

I made the environment modeling, animations, texturing, and the majority of the code(myself and AI generated).

Splat Crasht, a daring space adventurer, crash-lands onto a distant planet far away from his civilization. In order to return home, he must scavenge for components to repair his damaged spaceship. However, as he navigates this unfamiliar terrain, numerous dangers lurk around every corner, presenting him with perilous challenges along the way.

Clowning Around - PC Game SoSe2023

A game developed at **Gamefabrik II ProjectModule**

Developed by:

Marina Ramoska Vissotto

Ivan Yordanov Iliev

Jakub Hoffman

Danil Gusev

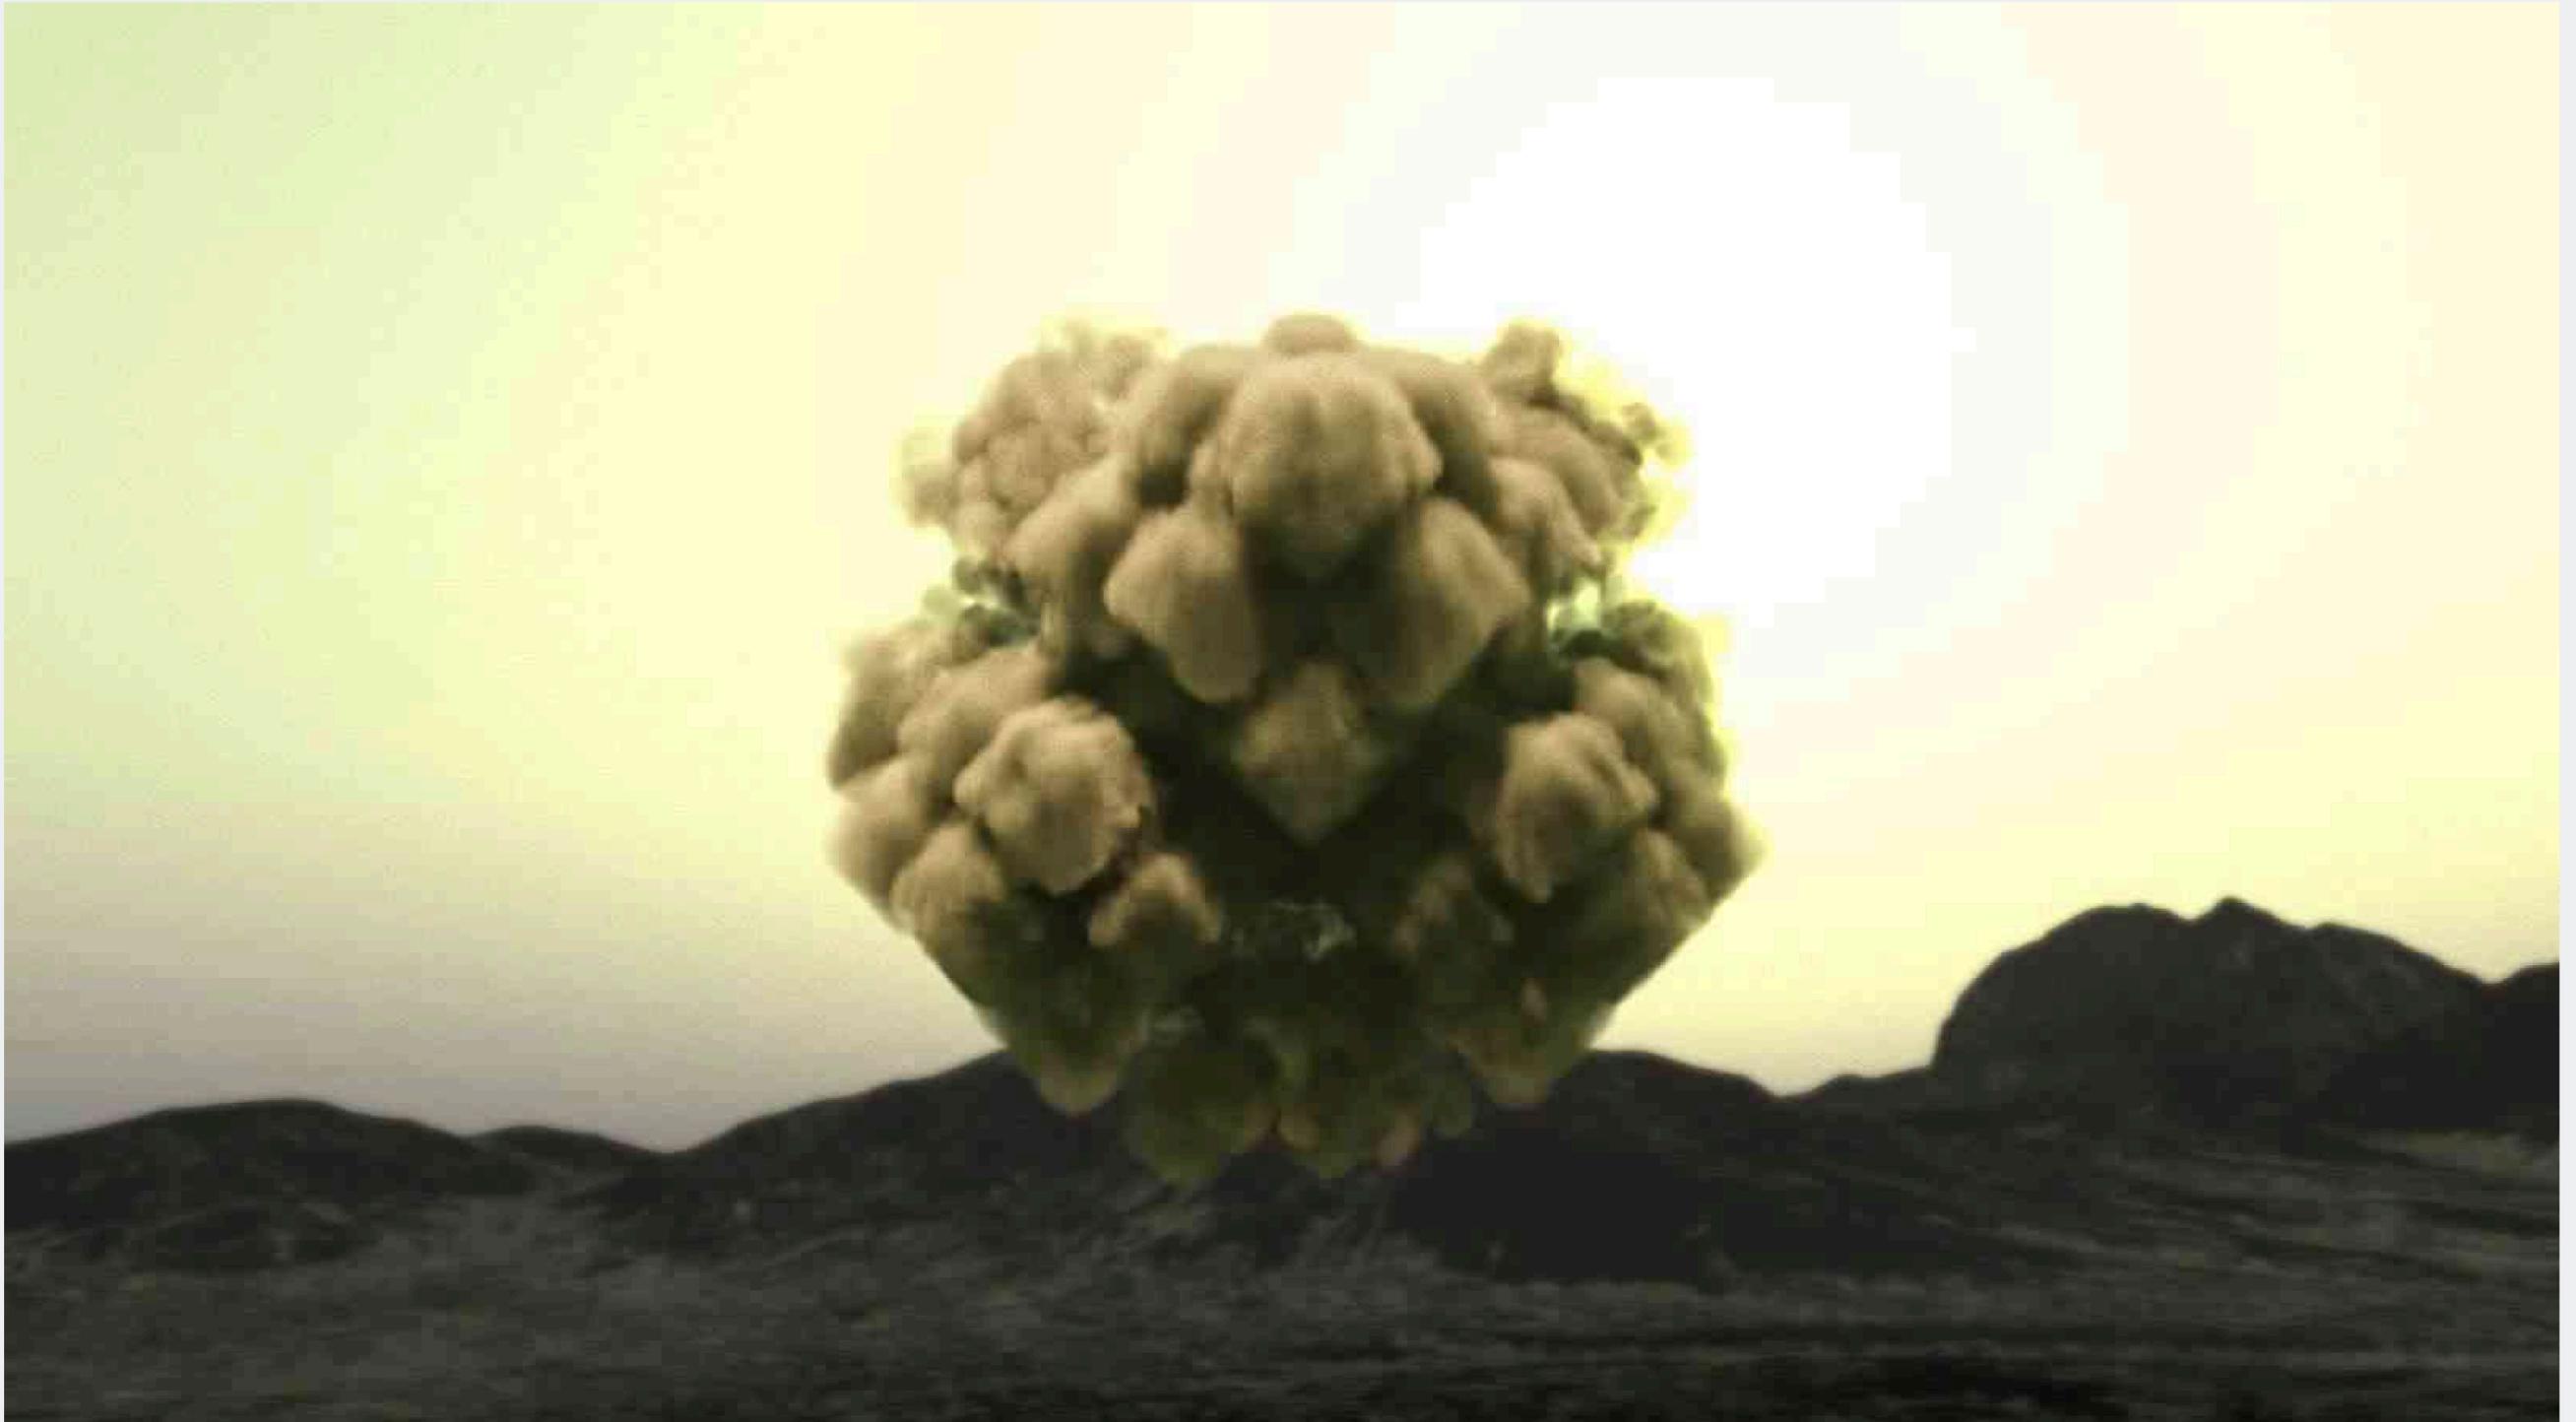

I made all environment modeling and design, animations, texturing, custom shading and the some code. I didn't design characters and their animations.

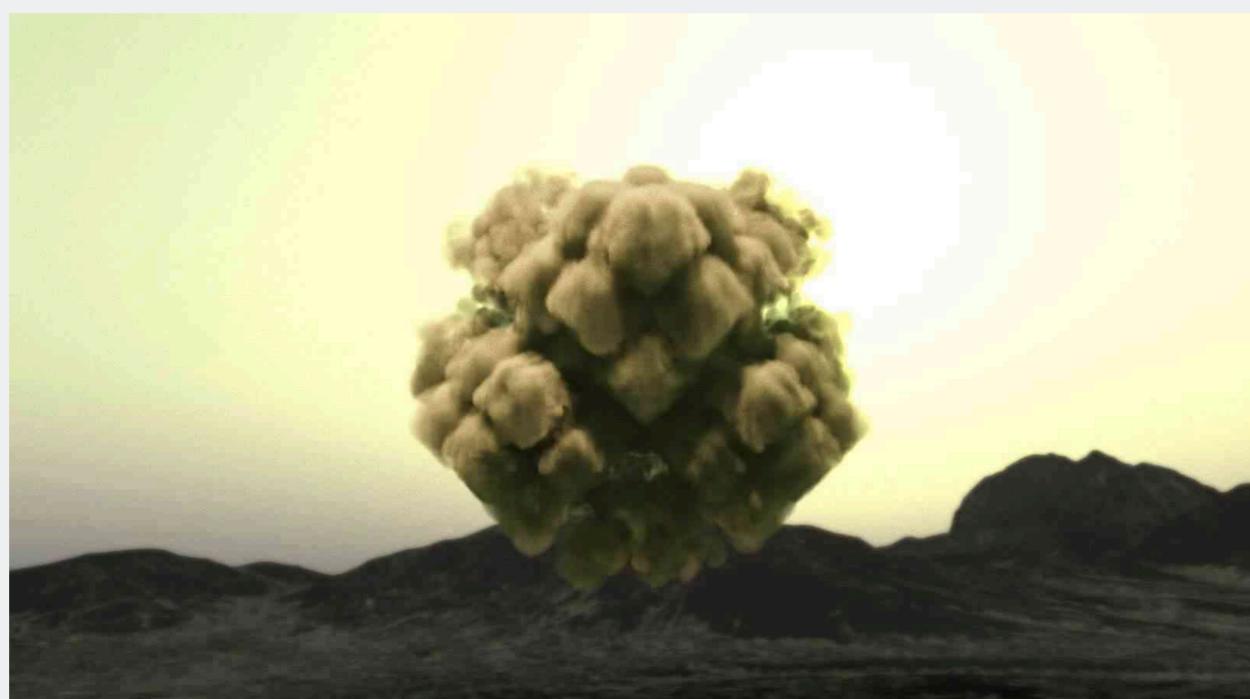

2024 Kreative Erzählkunst-Expressive3D-Animation in Blender-Houdini

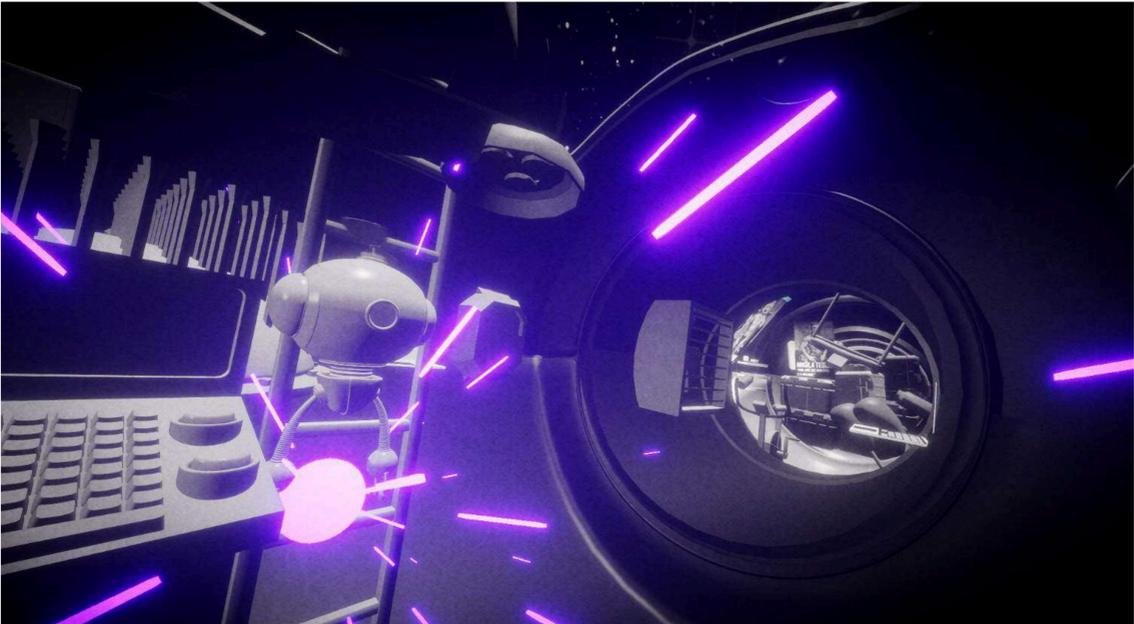

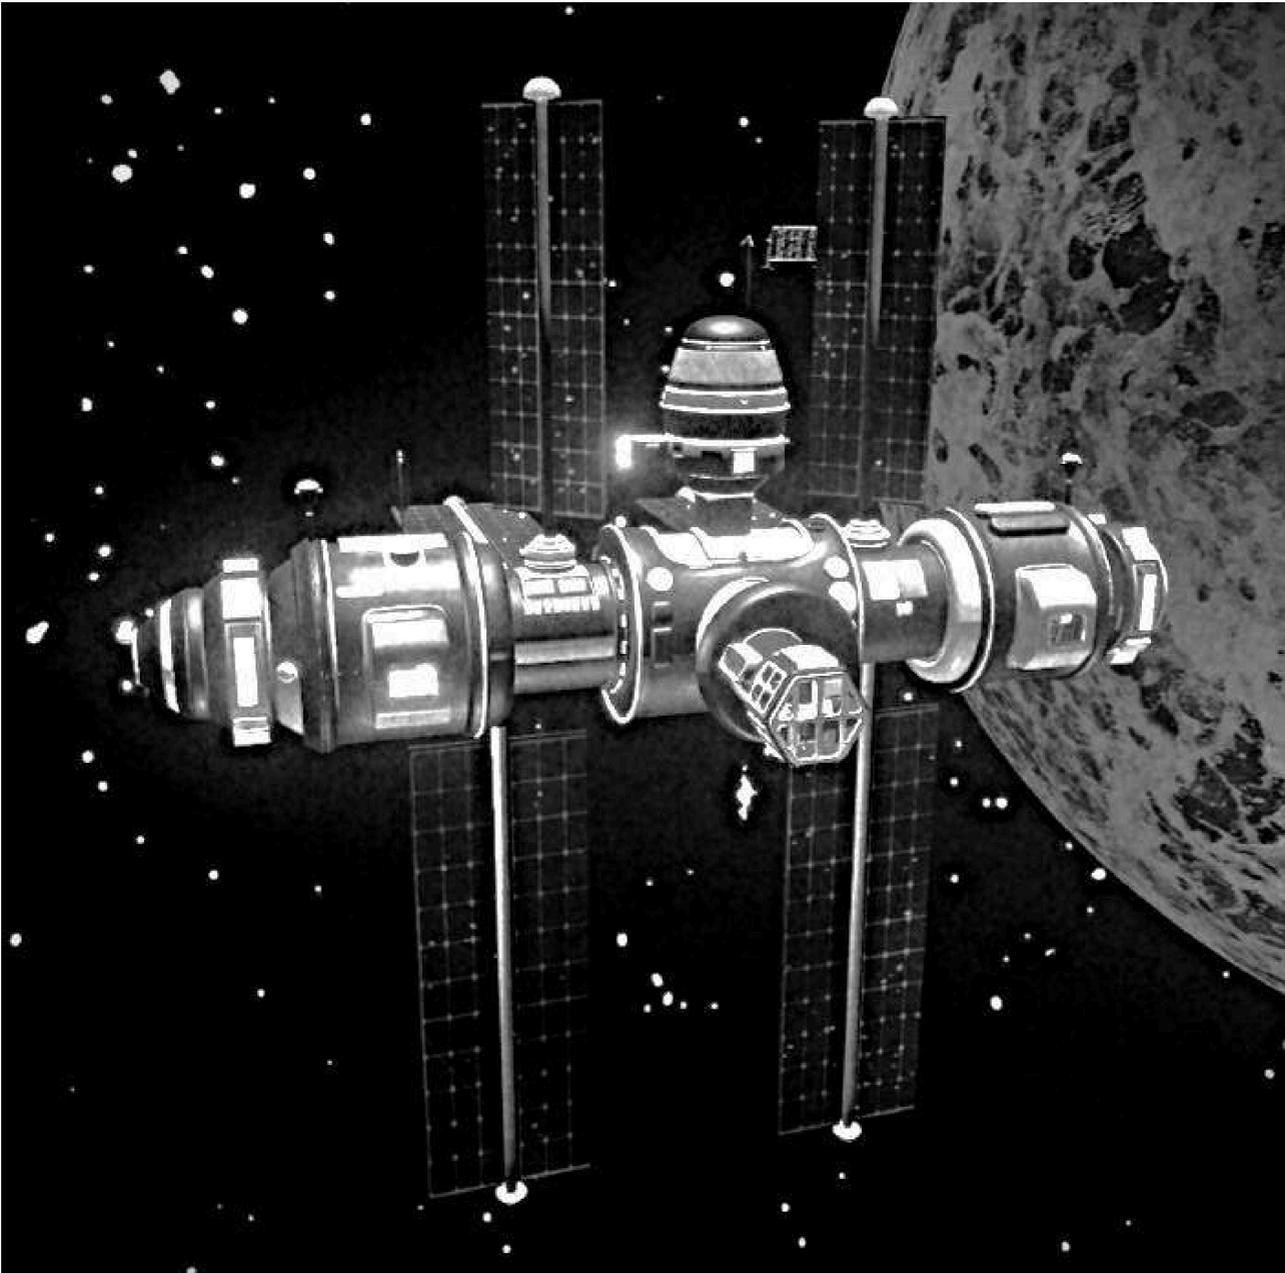

Fractal-driven smoke animations created in Houdini, rendered in EEVEE.

AstralAnarchy: The Moral Quandary - Game Technical Demo 2024

Ivan Iliev

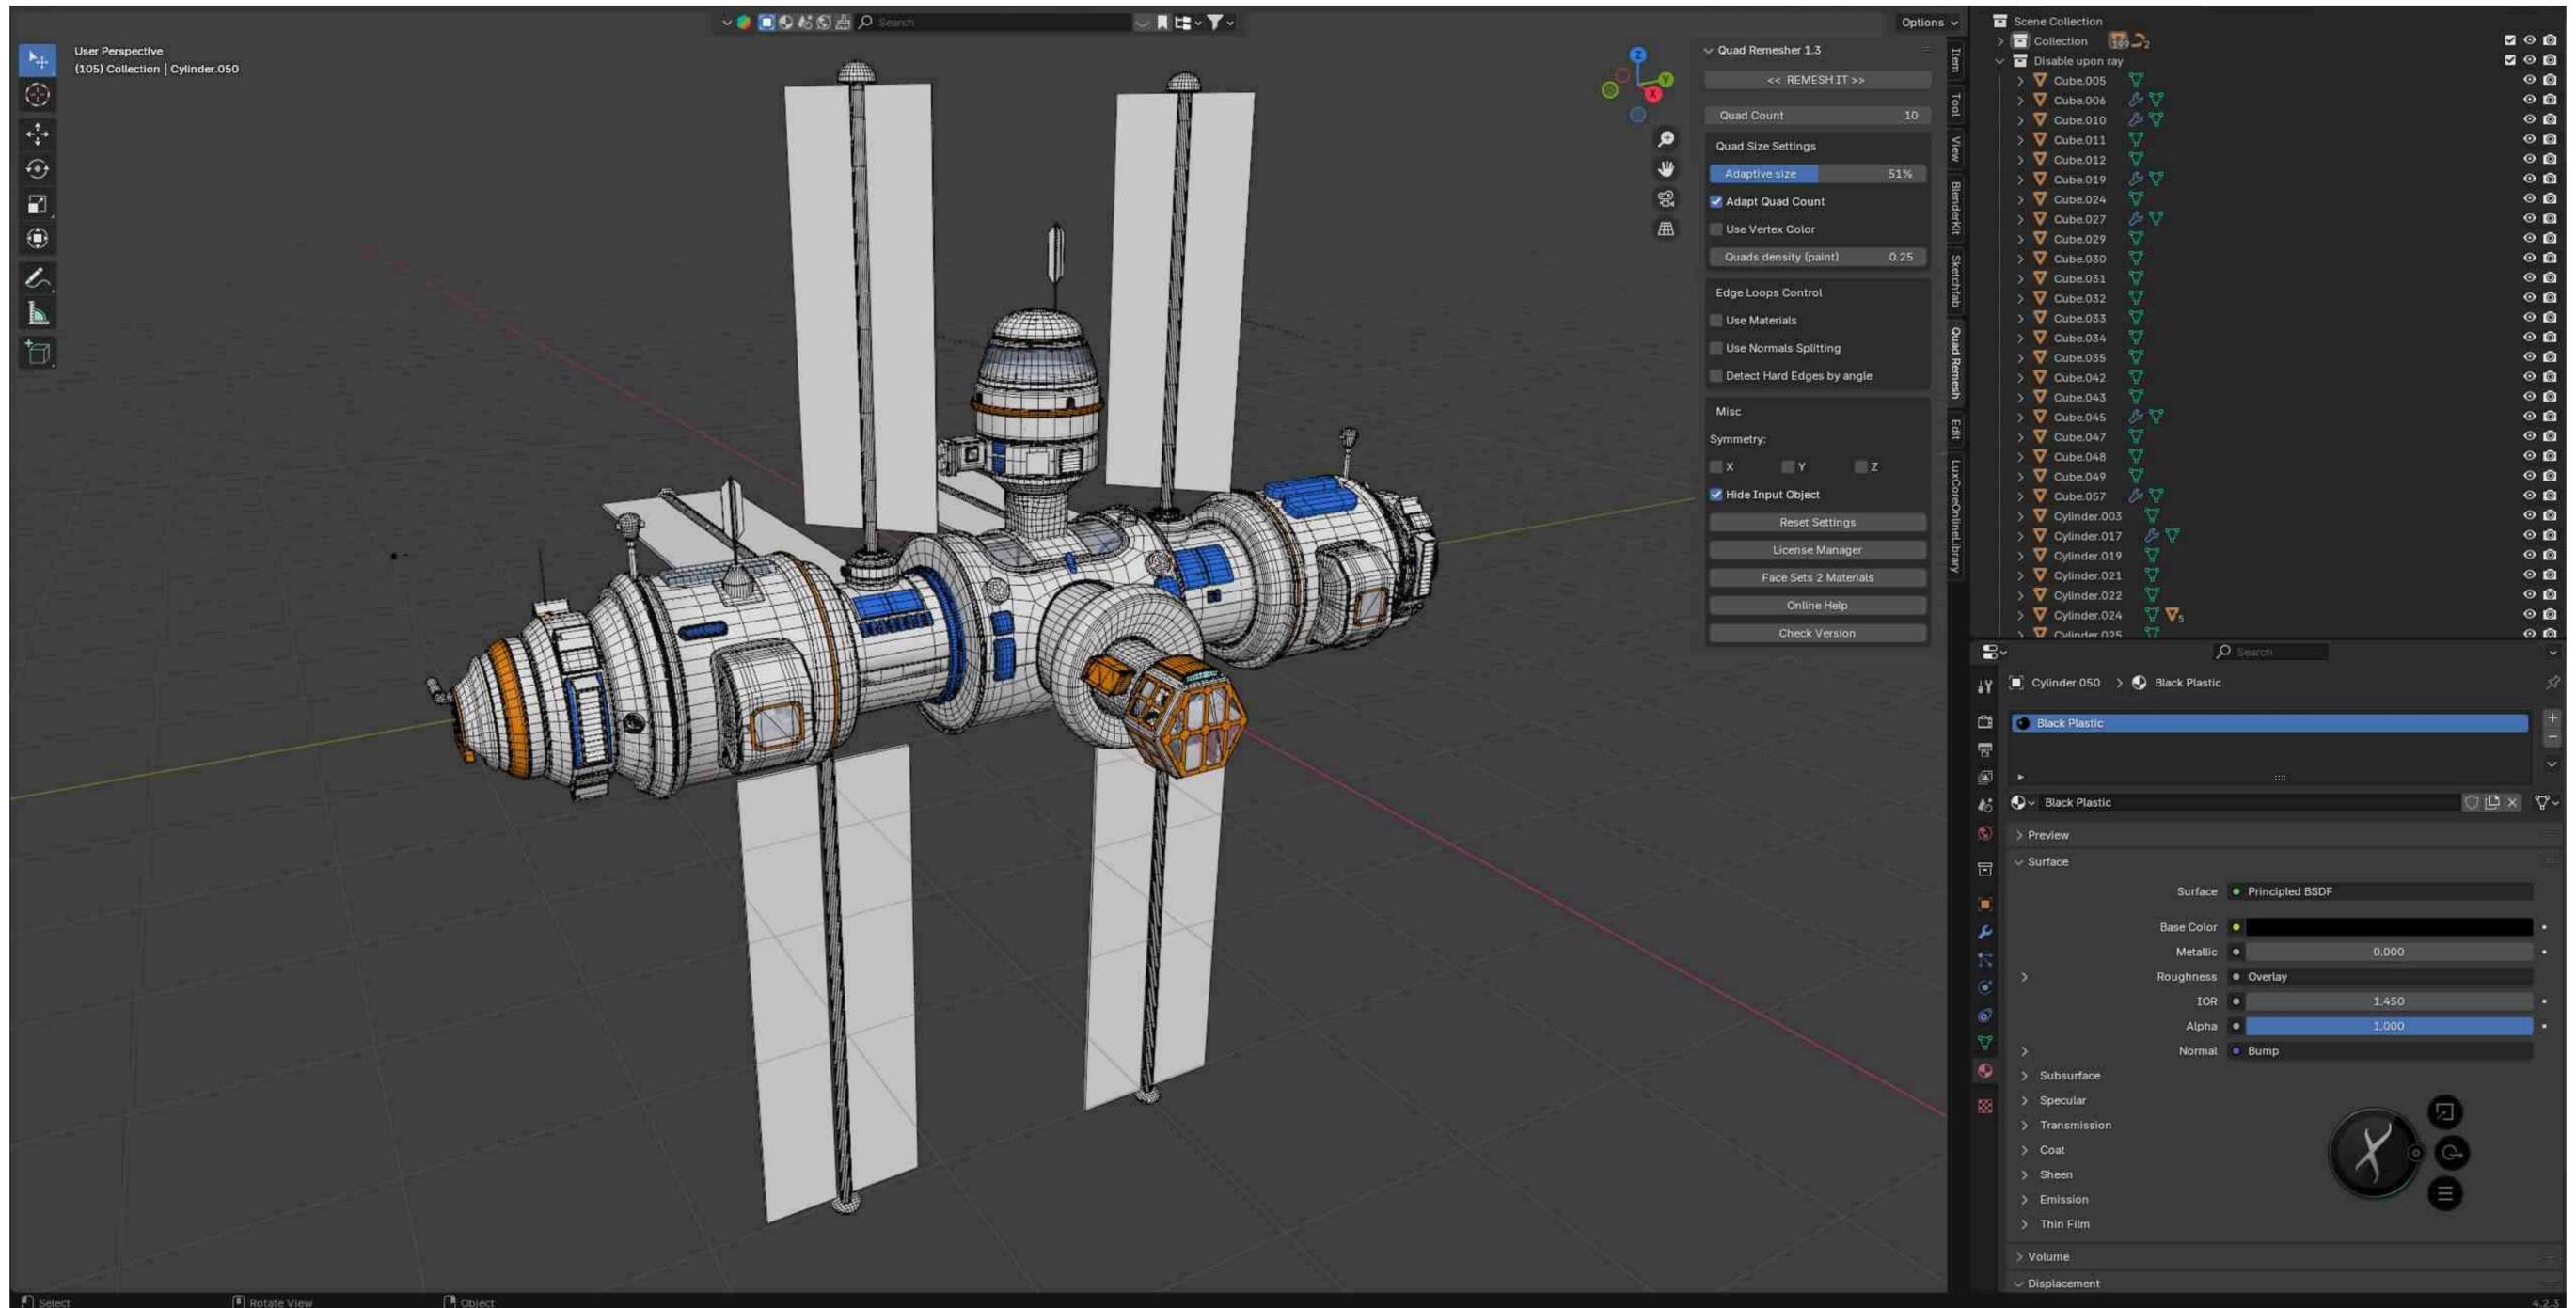

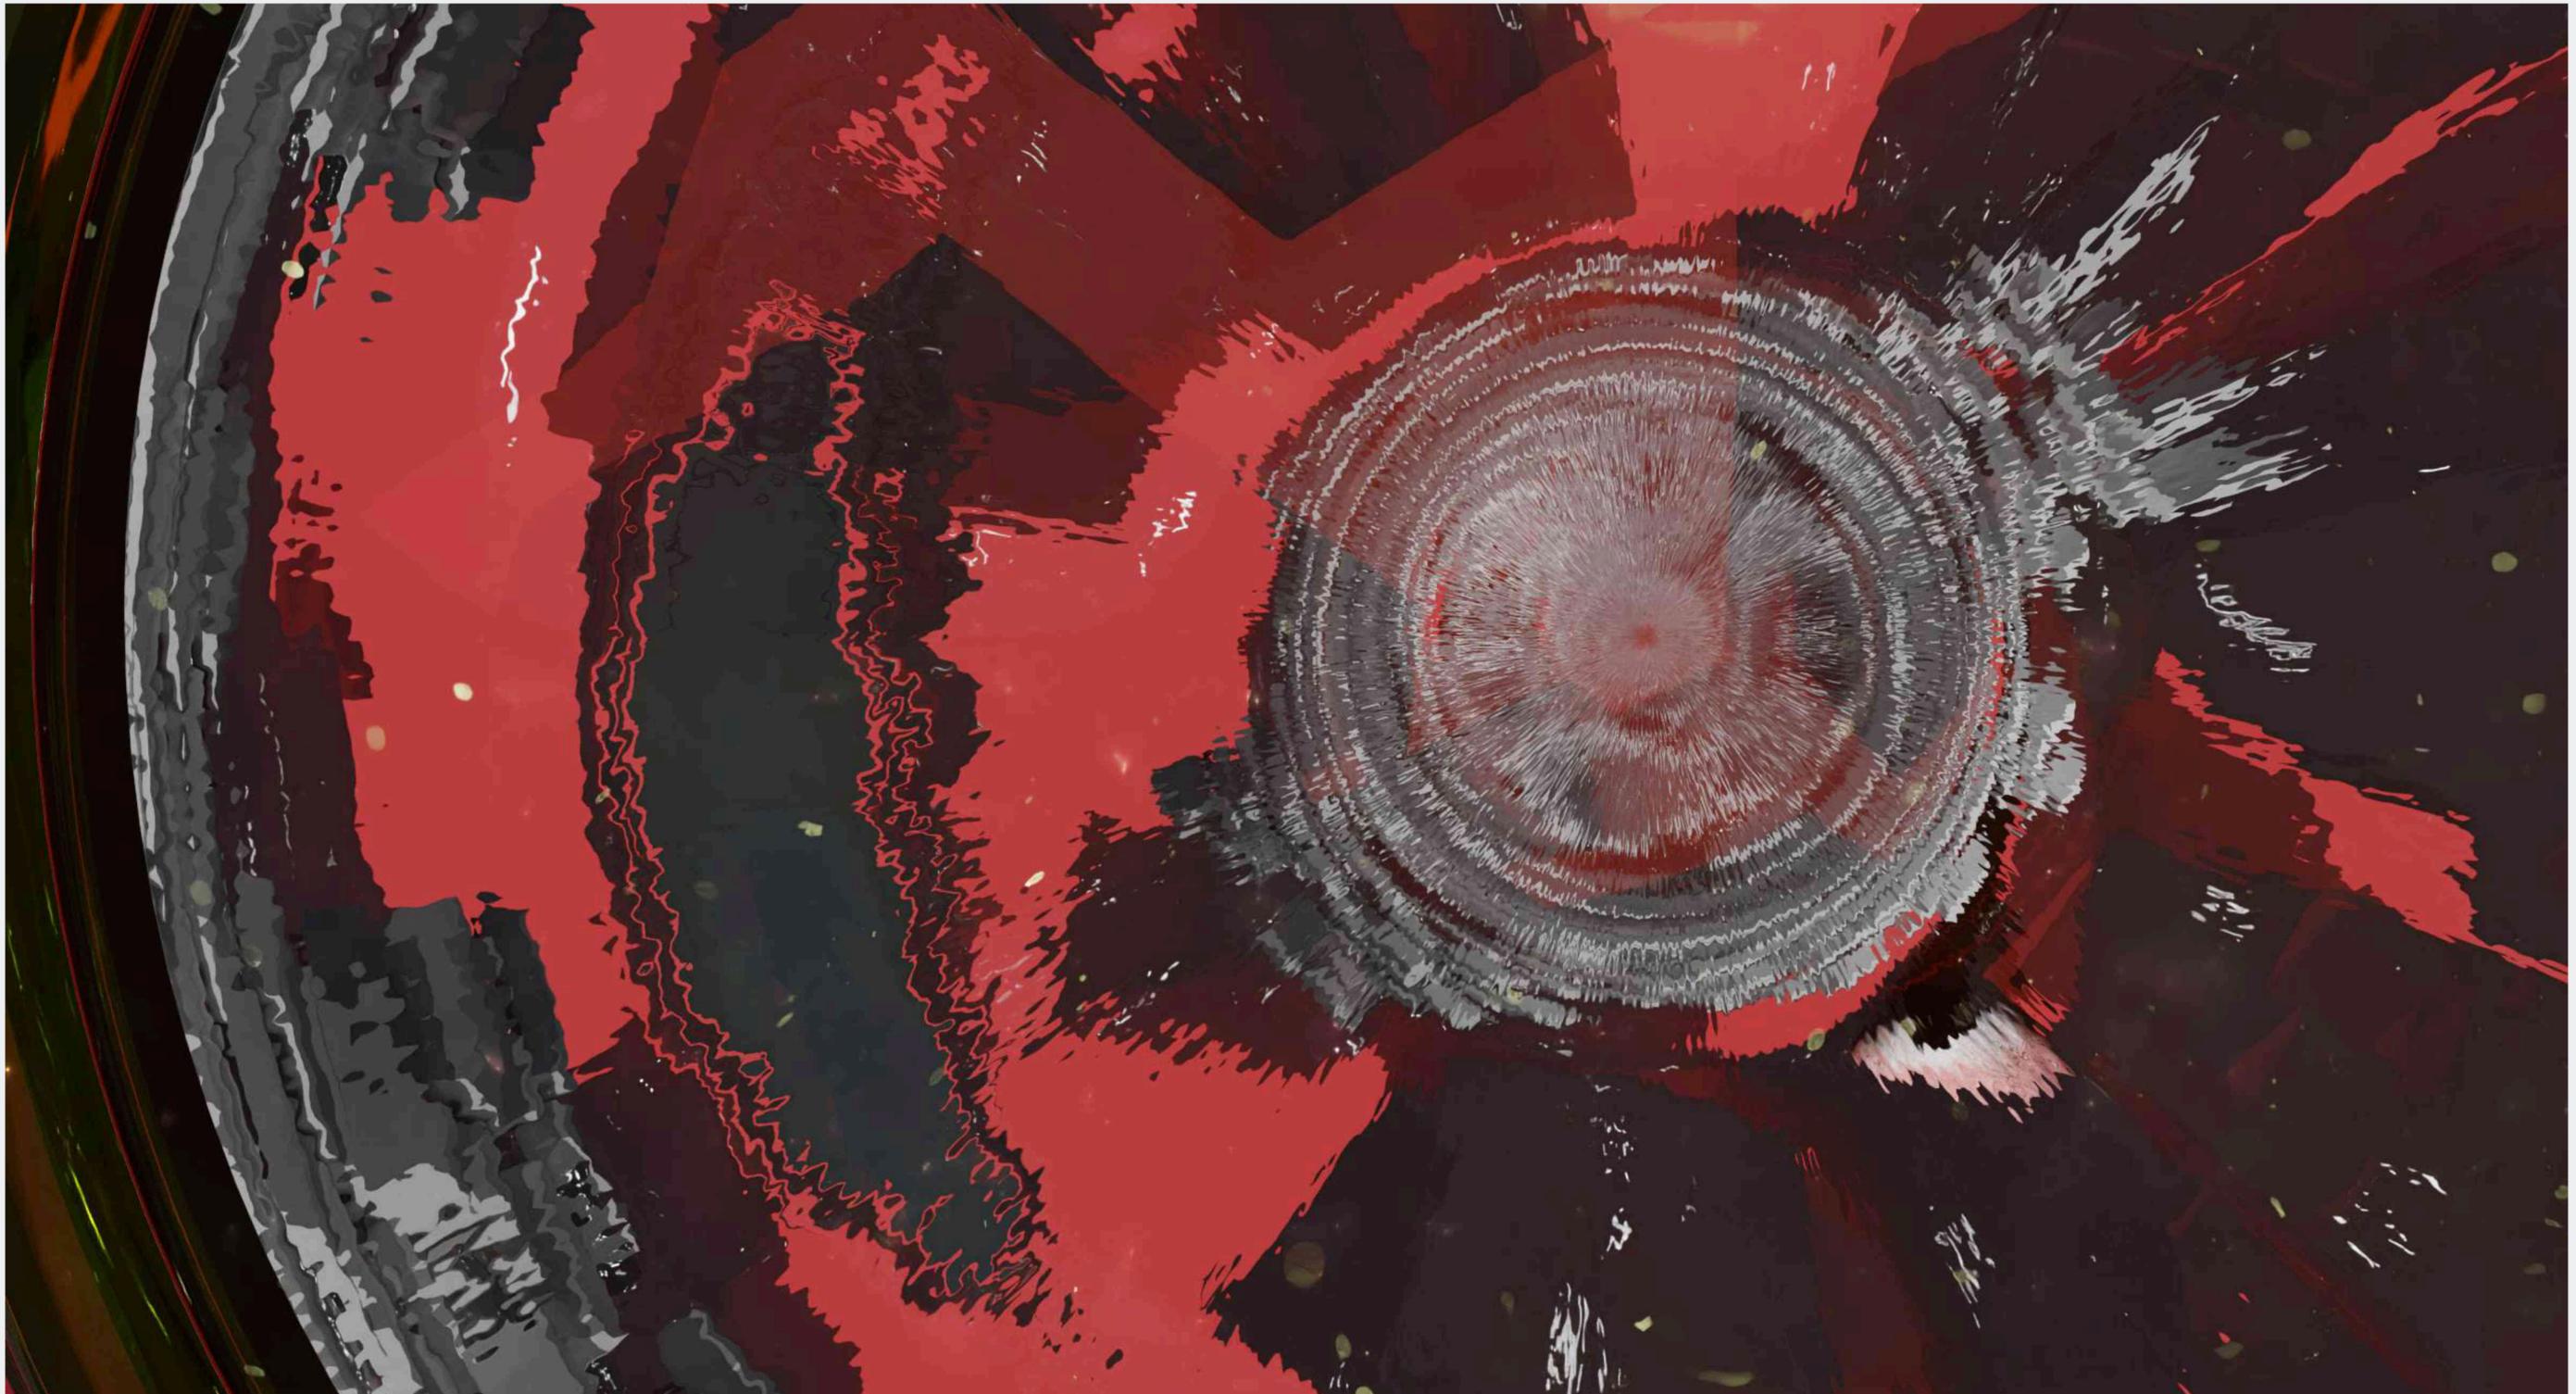

The Moral Quandary, where you must manage the unpredictable chaos of a spaceship—unless your insane crew drives you mad first. As the captain (or captains), it's up to you to navigate this galactic wreck through the vastness of space without ending up in an interstellar disaster.
